FIRST CONTACT

HUH?

Welcome
to the
project,
yeoman.

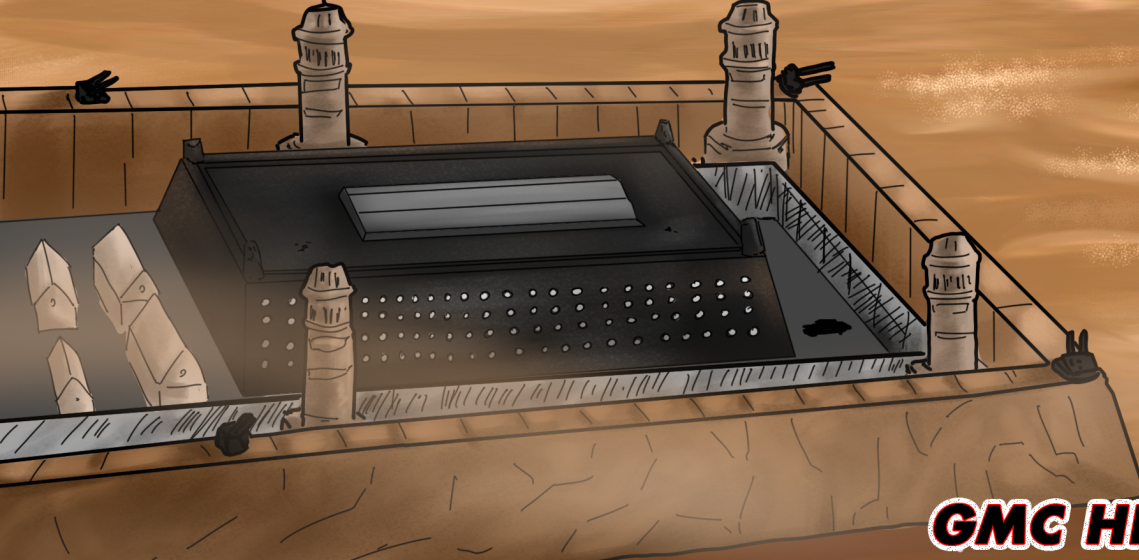

TWATT

Ouch! What
the...

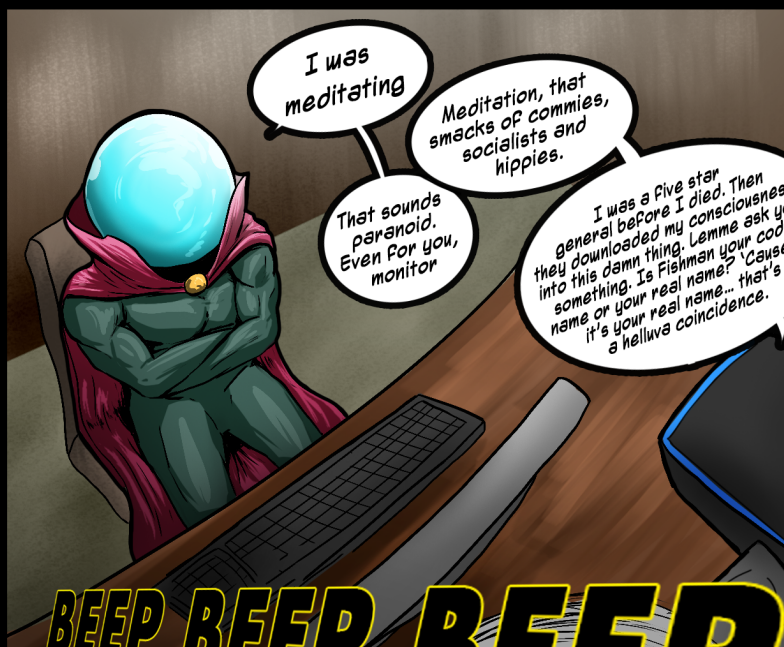

GMC HEADQUARTERS

You asleep?

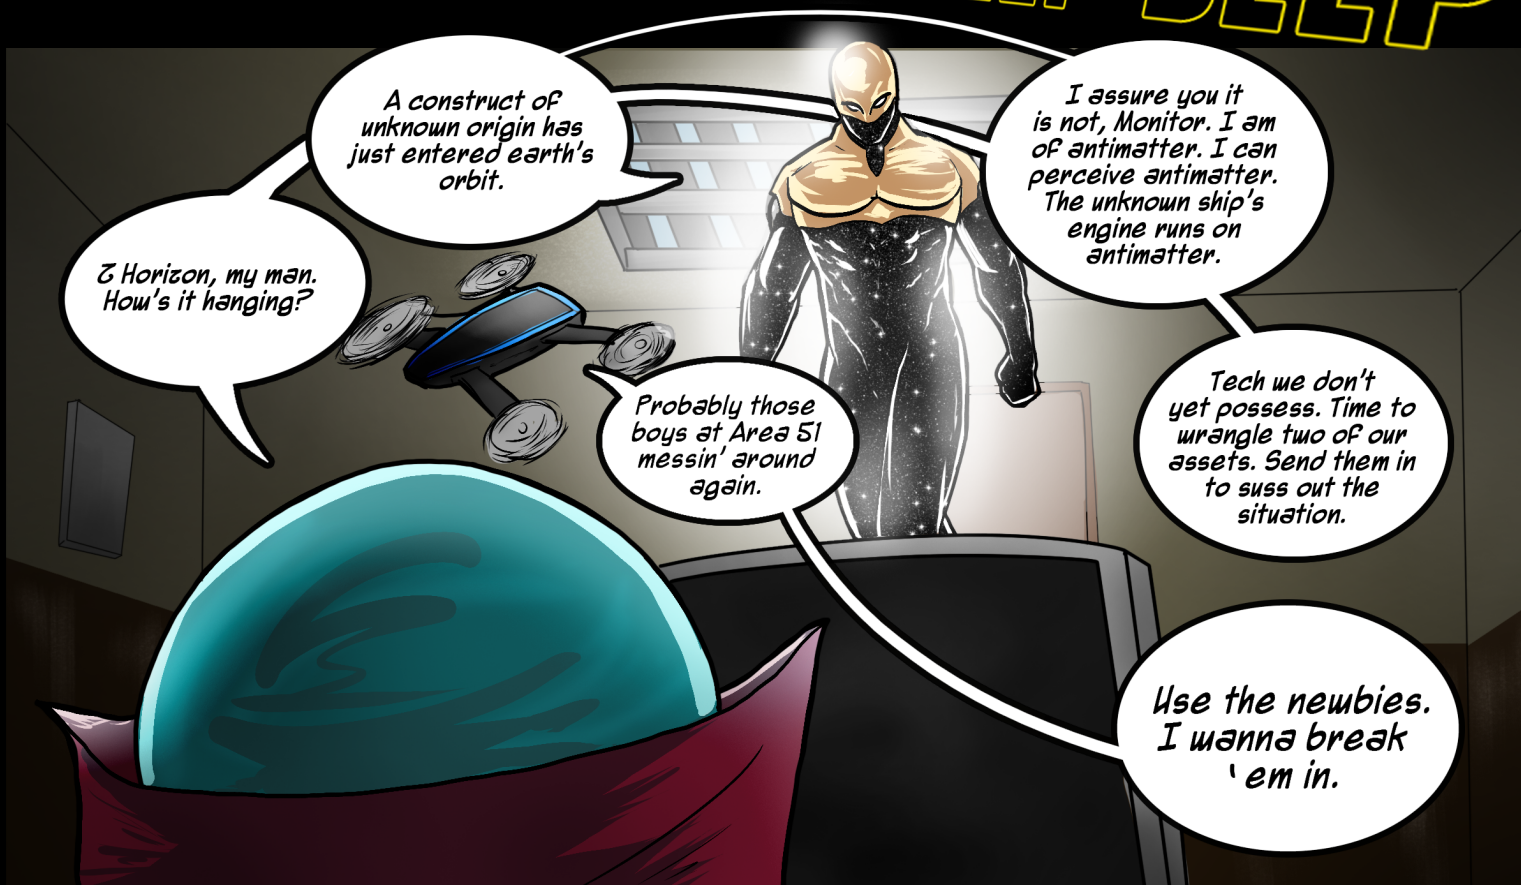

I was meditating

Meditation, that smacks of commies, socialists and hippies.

That sounds paranoid. Even for you, monitor

I was a five star general before I died. Then they downloaded my consciousness into this damn thing. Lemme ask you something. Is Fishmen your code name or your real name... that's a helluva coincidence.

BEEP BEEP BEEP

A construct of unknown origin has just entered earth's orbit.

3 Horizon, my man. How's it hanging?

Probably those boys at Area 51 messin' around again.

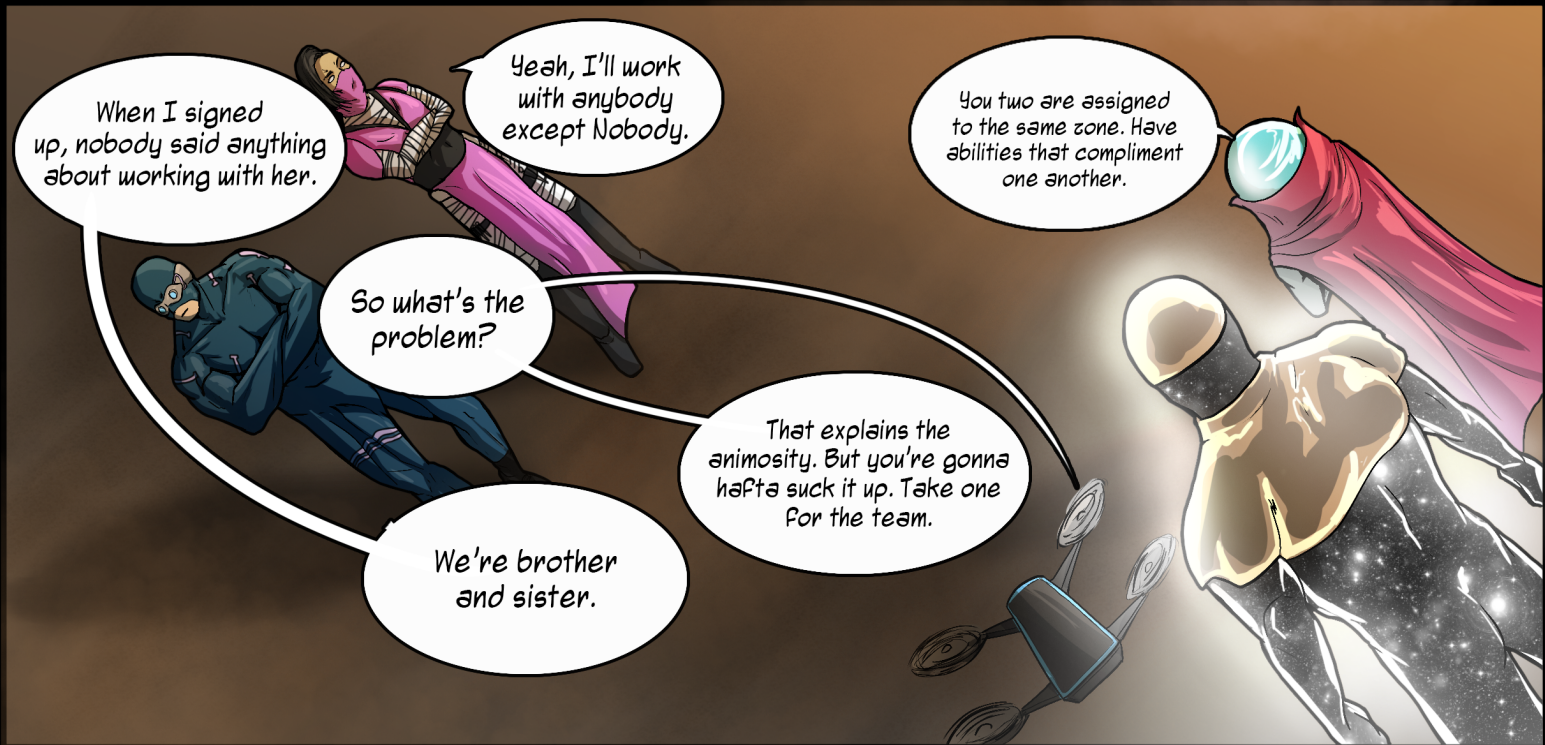

I assure you it is not, Monitor. I am of antimatter. I can perceive antimatter. The unknown ship's engine runs on antimatter.

Tech we don't yet possess. Time to wrangle two of our assets. Send them in to suss out the situation.

Use the newbies. I wanna break 'em in.

Guessing you're my ride.

When I signed up, nobody said anything about working with her.

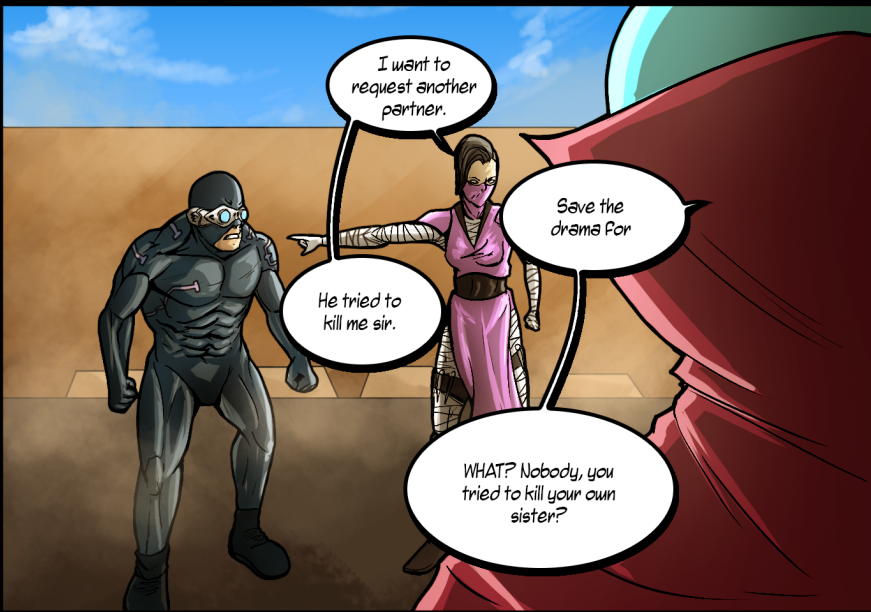

Yeah, I'll work with anybody except Nobody.

So what's the problem?

We're brother and sister.

You two are assigned to the same zone. Have abilities that compliment one another.

That explains the animosity. But you're gonna hafta suck it up. Take one for the team.

I want to request another partner.

He tried to kill me sir.

Save the drama for

WHAT? Nobody, you tried to kill your own sister?

That's a damn lie!

Is not

Okay, maybe I tried to kill you... a little. But, in my defense,

I was possessed by a two thousand year old Japanese demon at the time.

That's what they all say.

I need you both to take that aggression and use it on the enemy.

Why don't you send Z Horizon? Isn't he supposed to have the power of a demigod or something?

Suck the whole solar system into an antimatter void.

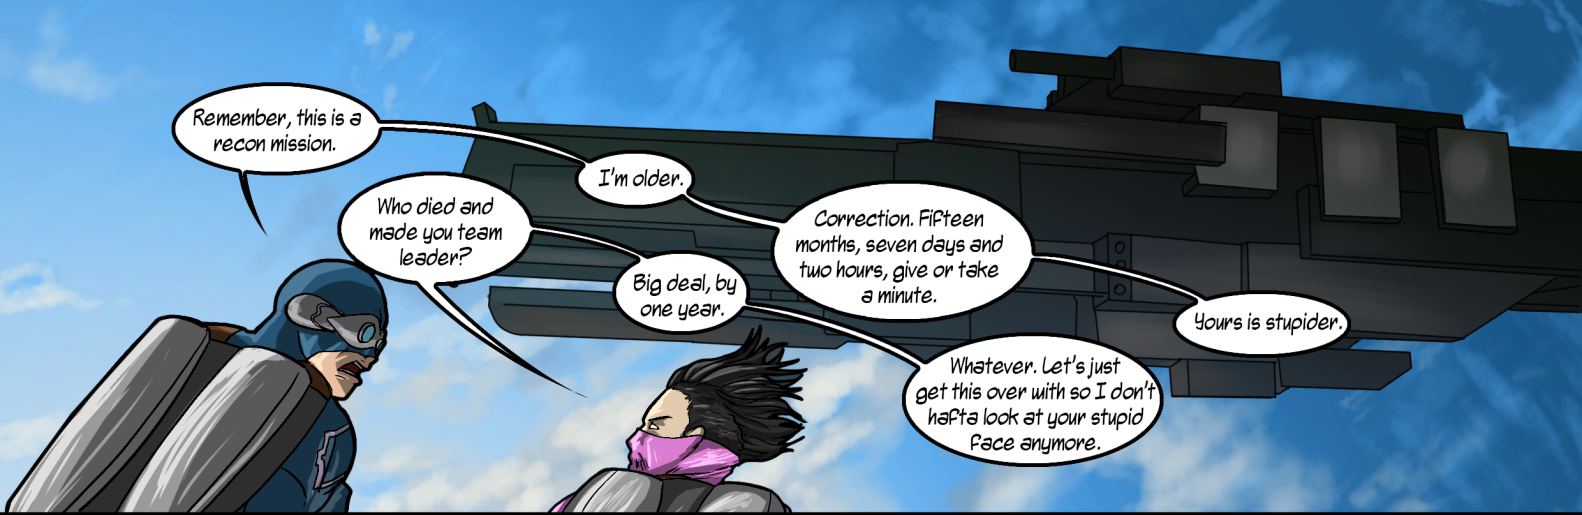

If they are the enemy

If I start manifesting antimatter... it could cause a mass chain reaction.

So... question. What good is a superpower you can't use?

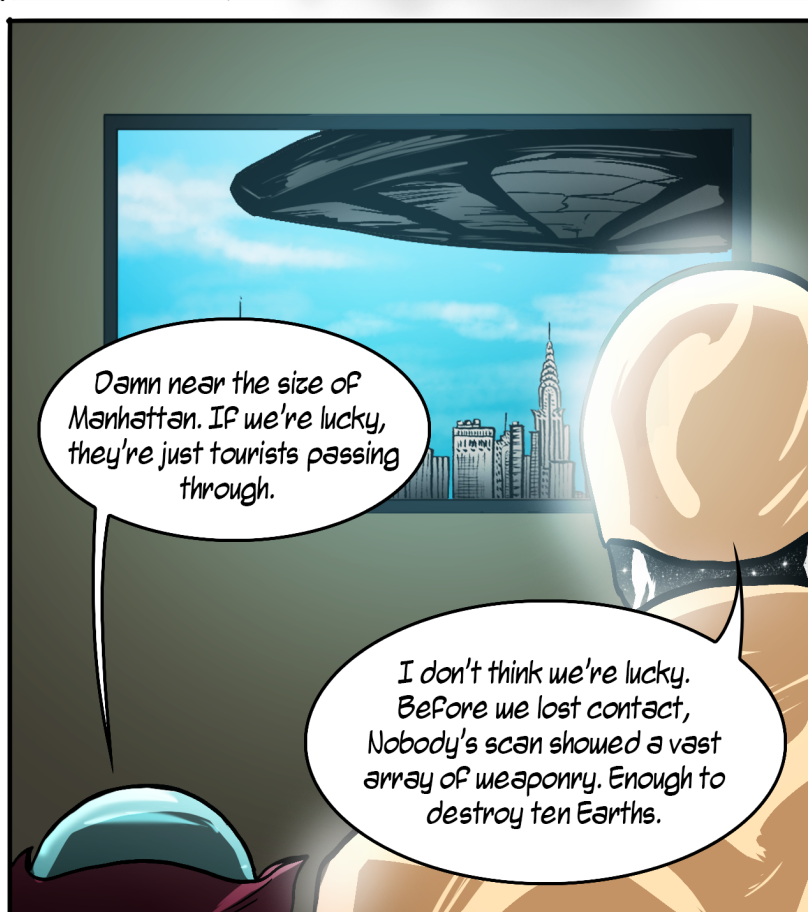

I'm with Kanna on that one

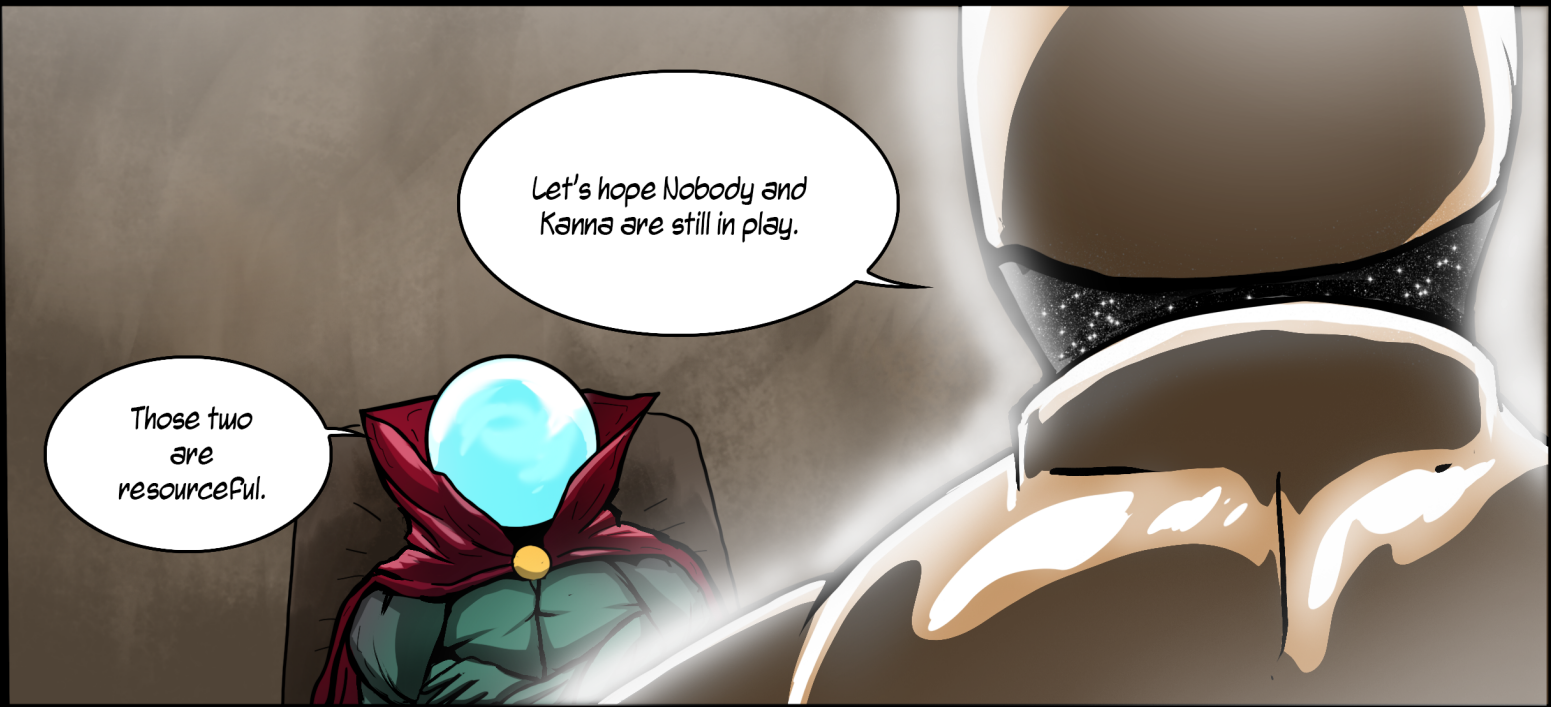

We'll lost touch
with the
operatives.

Damn.

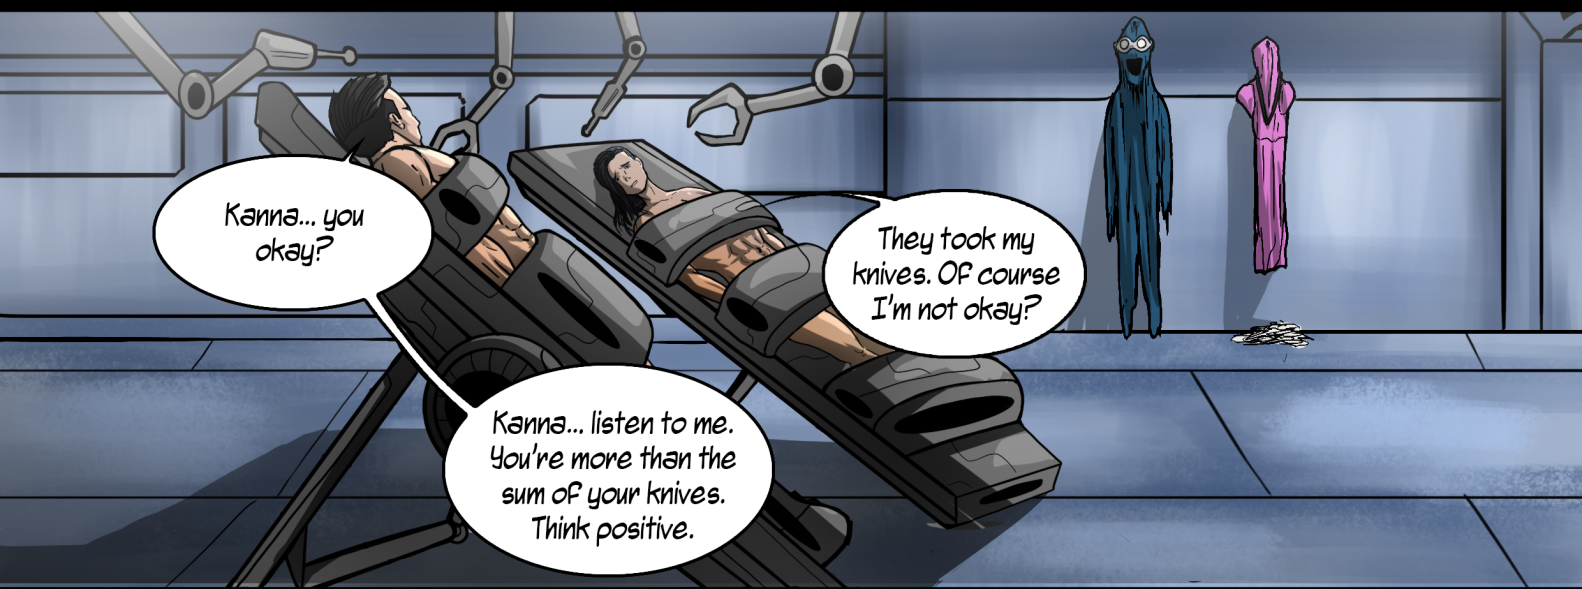

Damn near the size of
Manhattan. IF we're lucky,
they're just tourists passing
through.

I don't think we're lucky.
Before we lost contact,
Nobody's scan showed a vast
array of weaponry. Enough to
destroy ten Earths.

Let's hope Nobody and Kanna are still in play.

Those two are resourceful.

Kanna... you okay?

They took my knives. Of course I'm not okay?

Kanna... listen to me. You're more than the sum of your knives. Think positive.

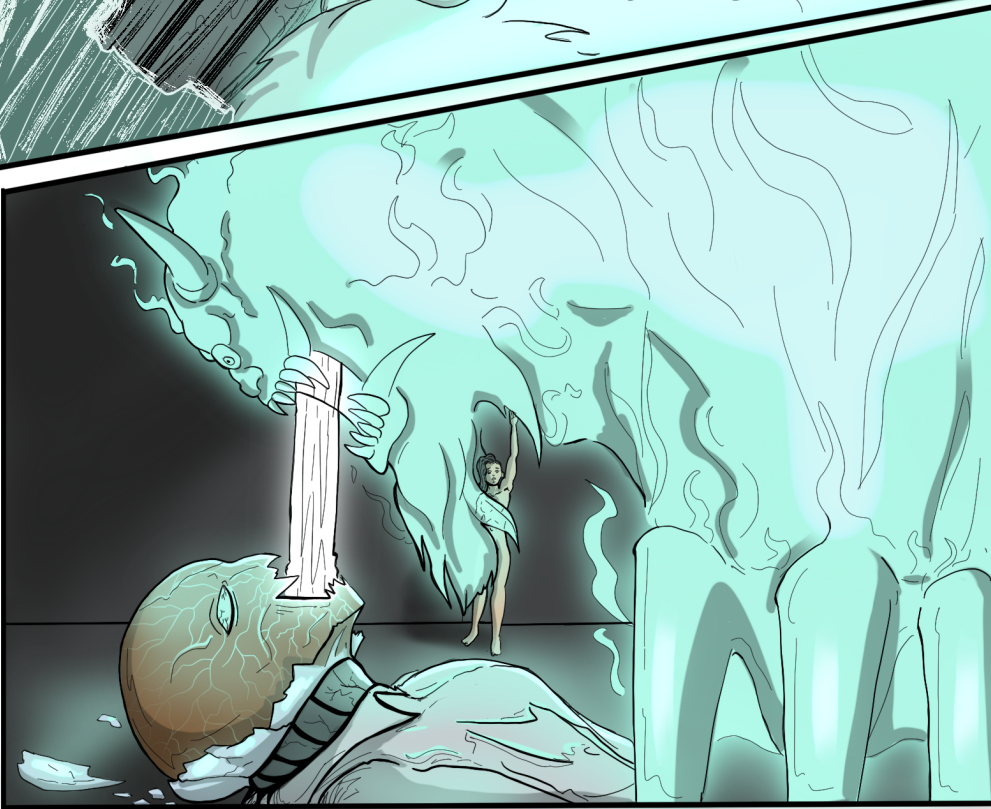

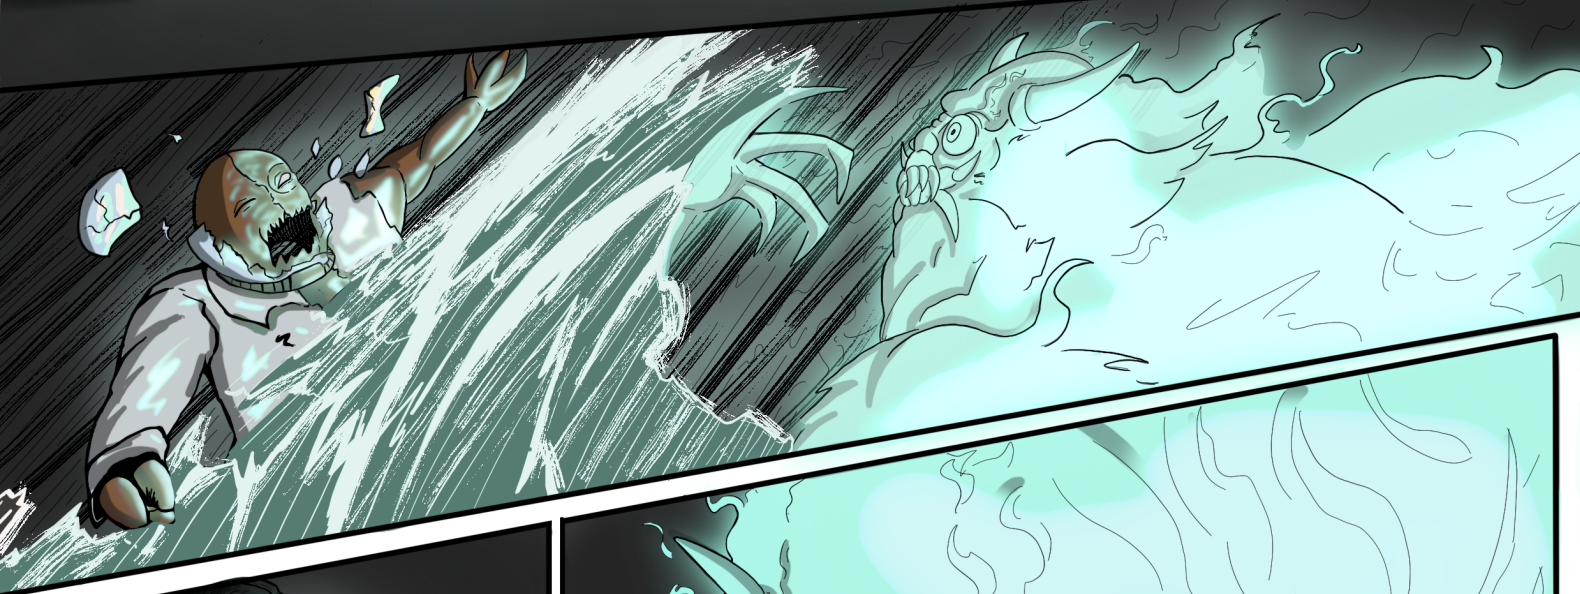

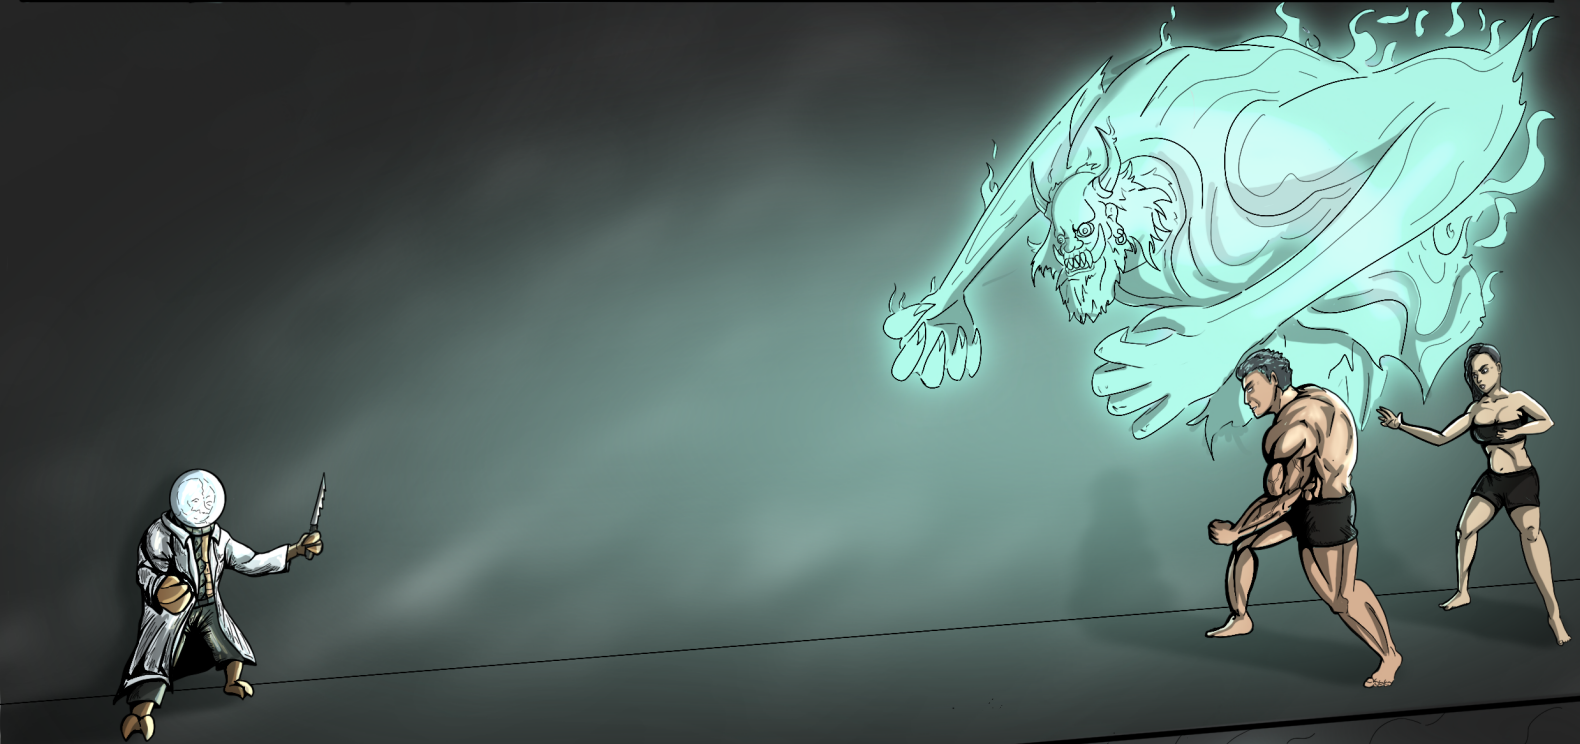

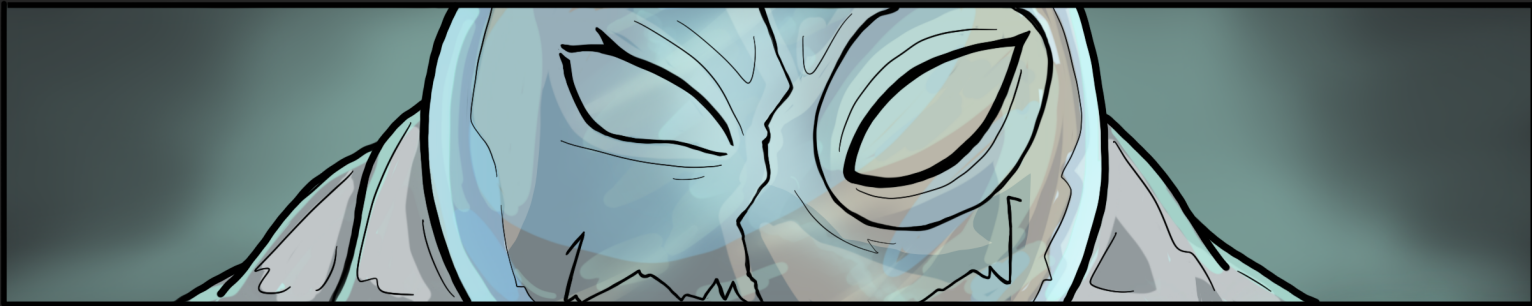

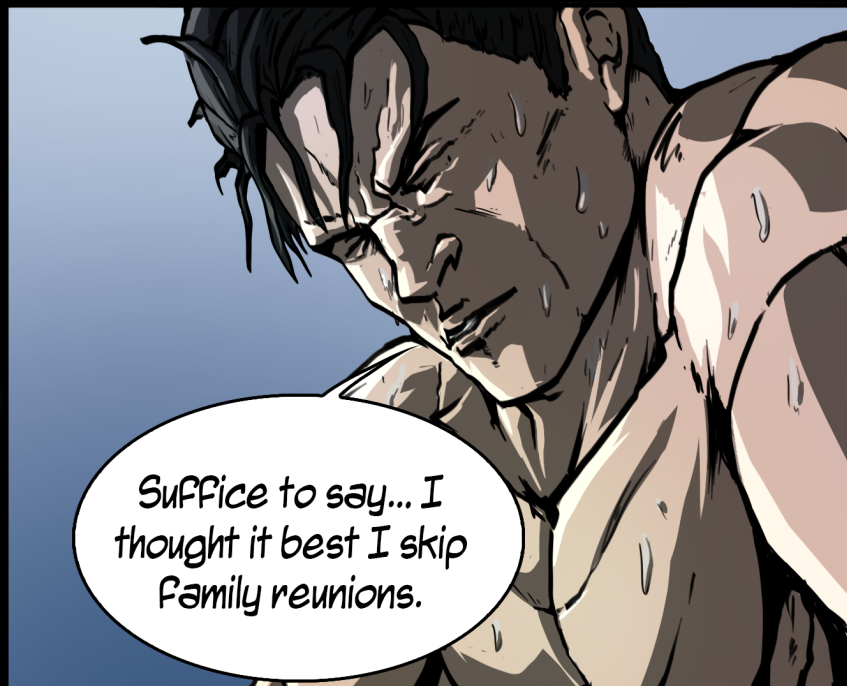

KIRARK
KIRARK

I'm positive they're going to vivisect us.

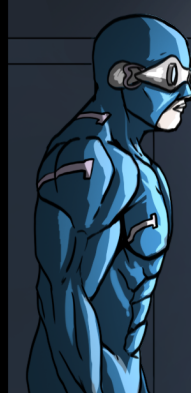

Suffice to say... I thought it best I skip Family reunions.

What Family? You and I are the only Family we have left.

I accept you for who you are, Nobody. Flaws... demons and all.

If you two are done taking the nickel tour... we've got work to do. I'm your back up.

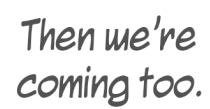

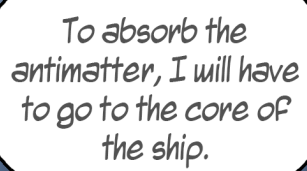

Yeah. No offense, Z Dog, but how can you help against a ka-zillion badass aliens if you can't use your powers?

You mean, our back-up with the safety on?

By absorbing all of the antimatter from the ship's engine, leaving them crippled and defenseless.

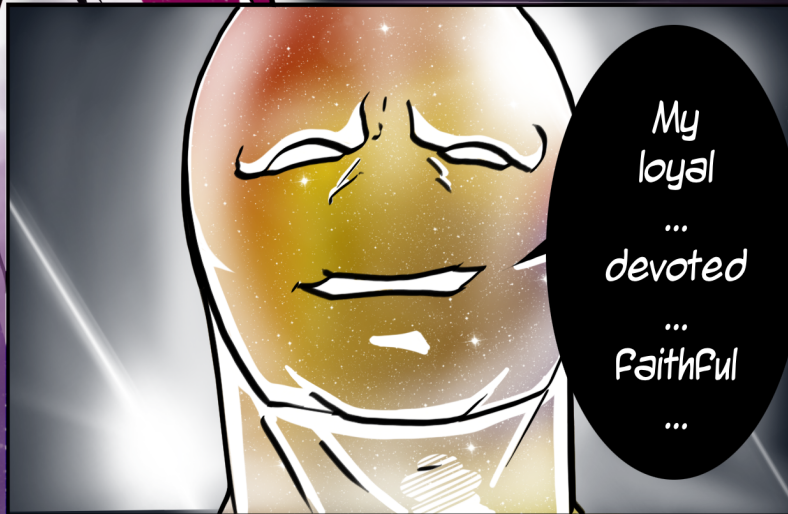

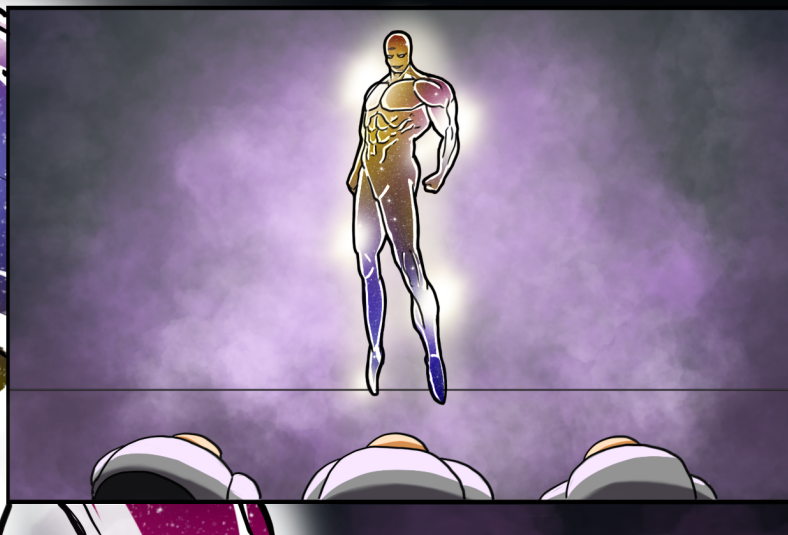

Z, my man..

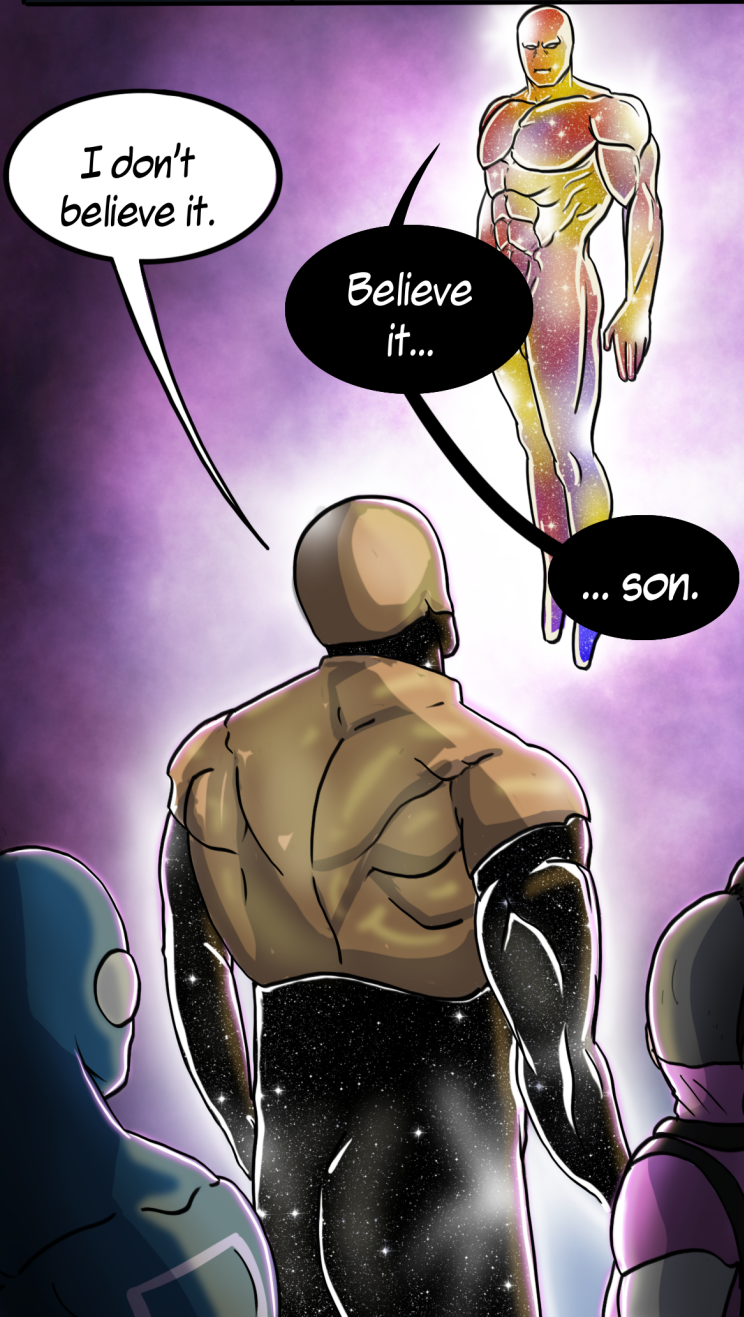

Finally...

My
loyal
...
devoted
...
Faithful
...

...
insects

I don't believe it.

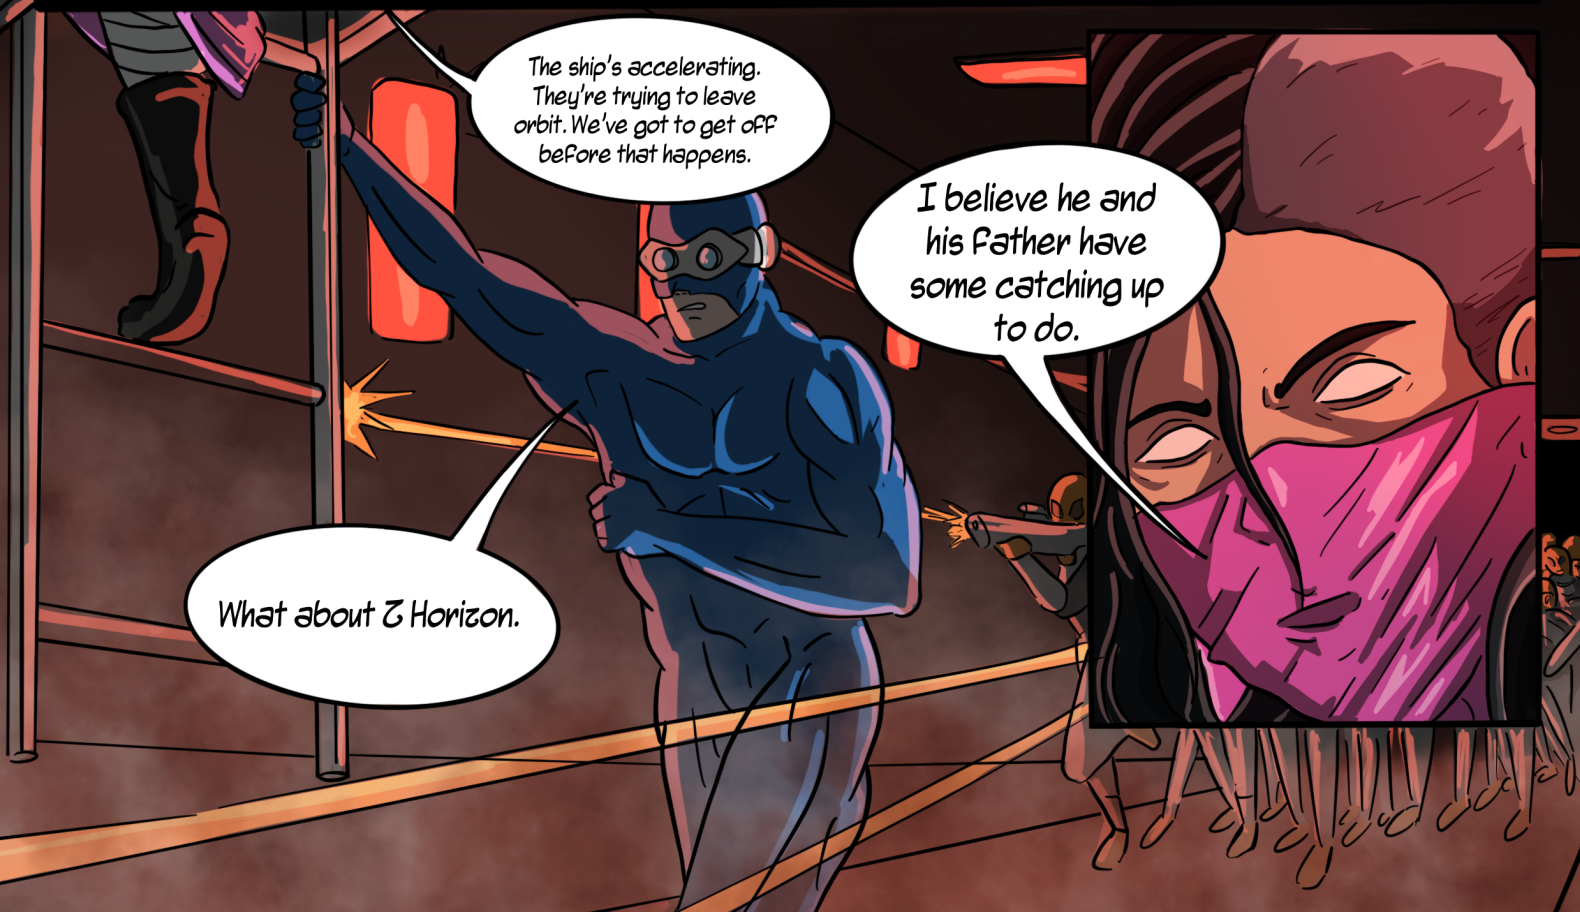

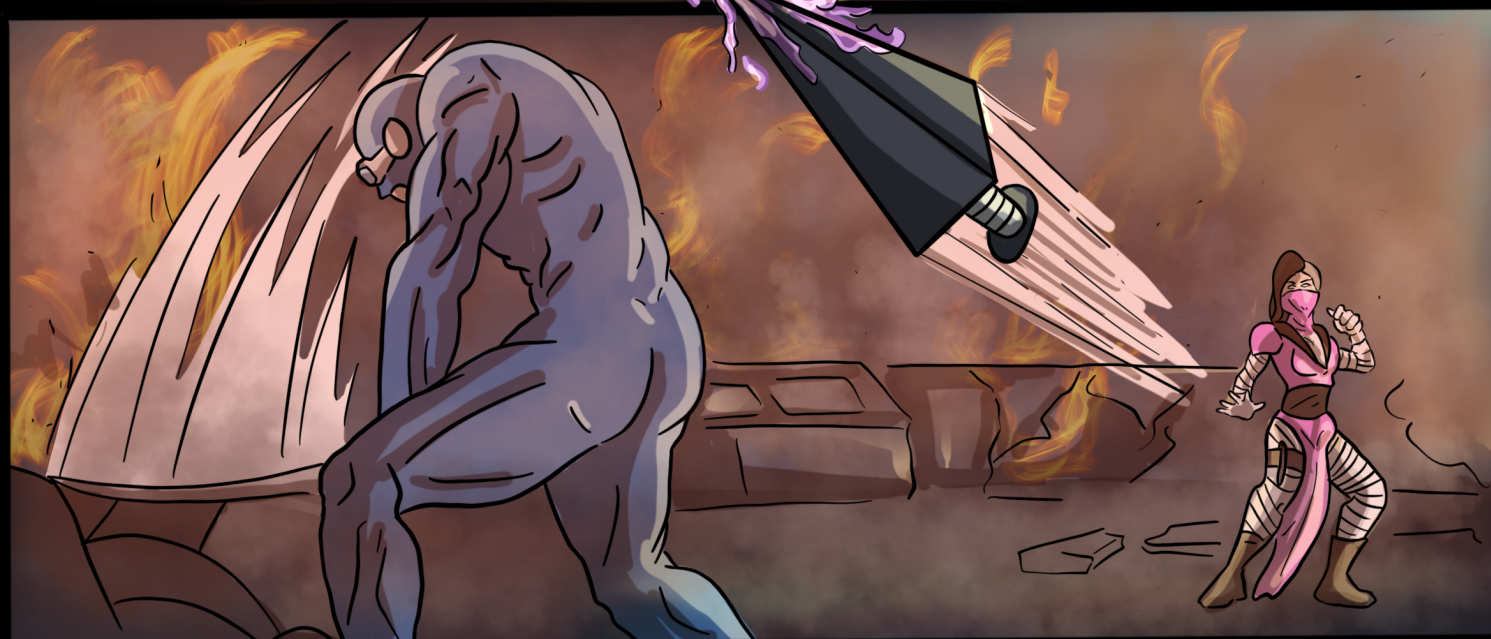

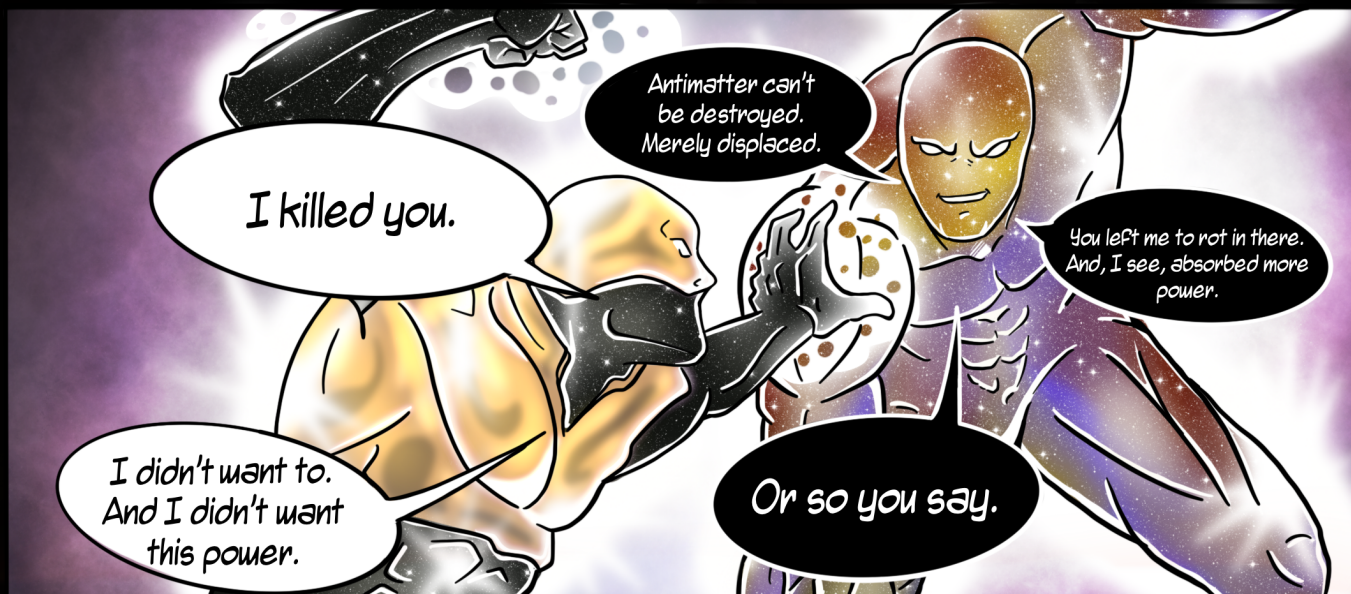

Believe it...

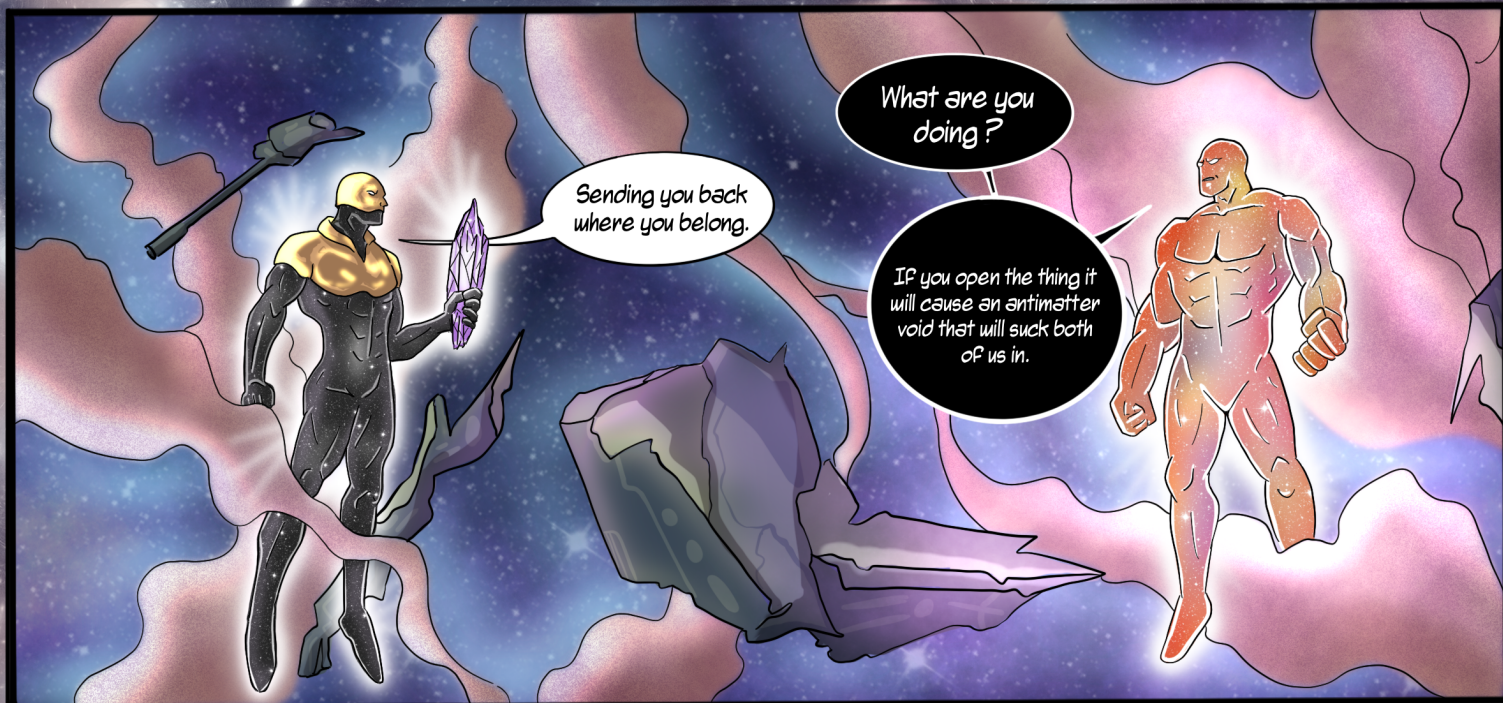

... son.

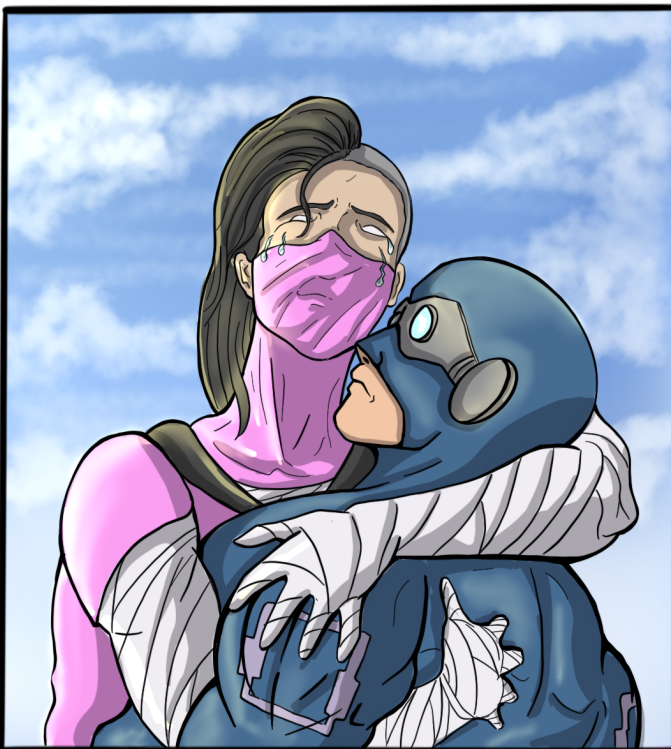

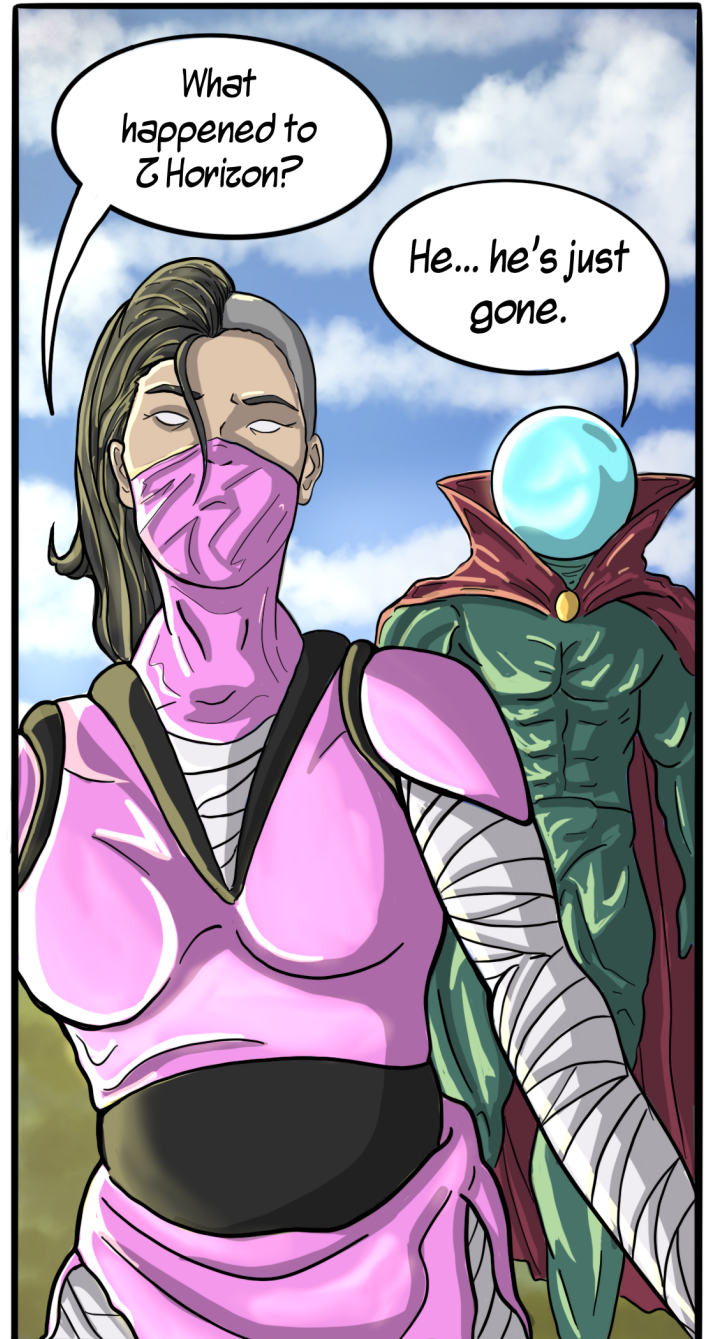

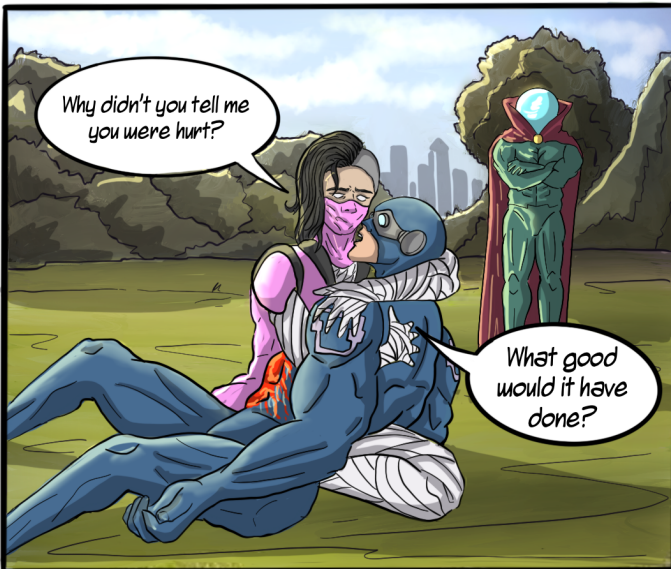

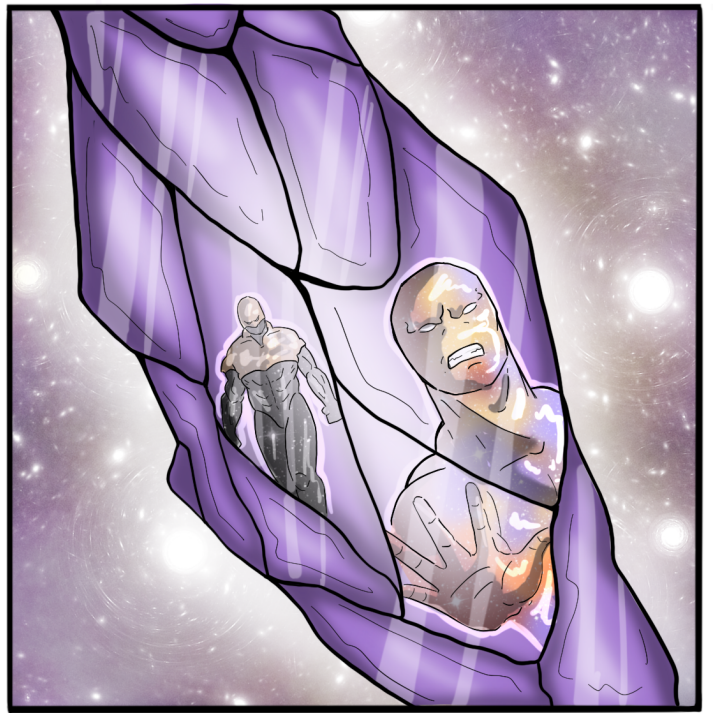

Nobody... Kanna... it's up to you to disable the ship now. I have to deal with... dad.

Don't have to tell us twice.
